Forensic Entities Page

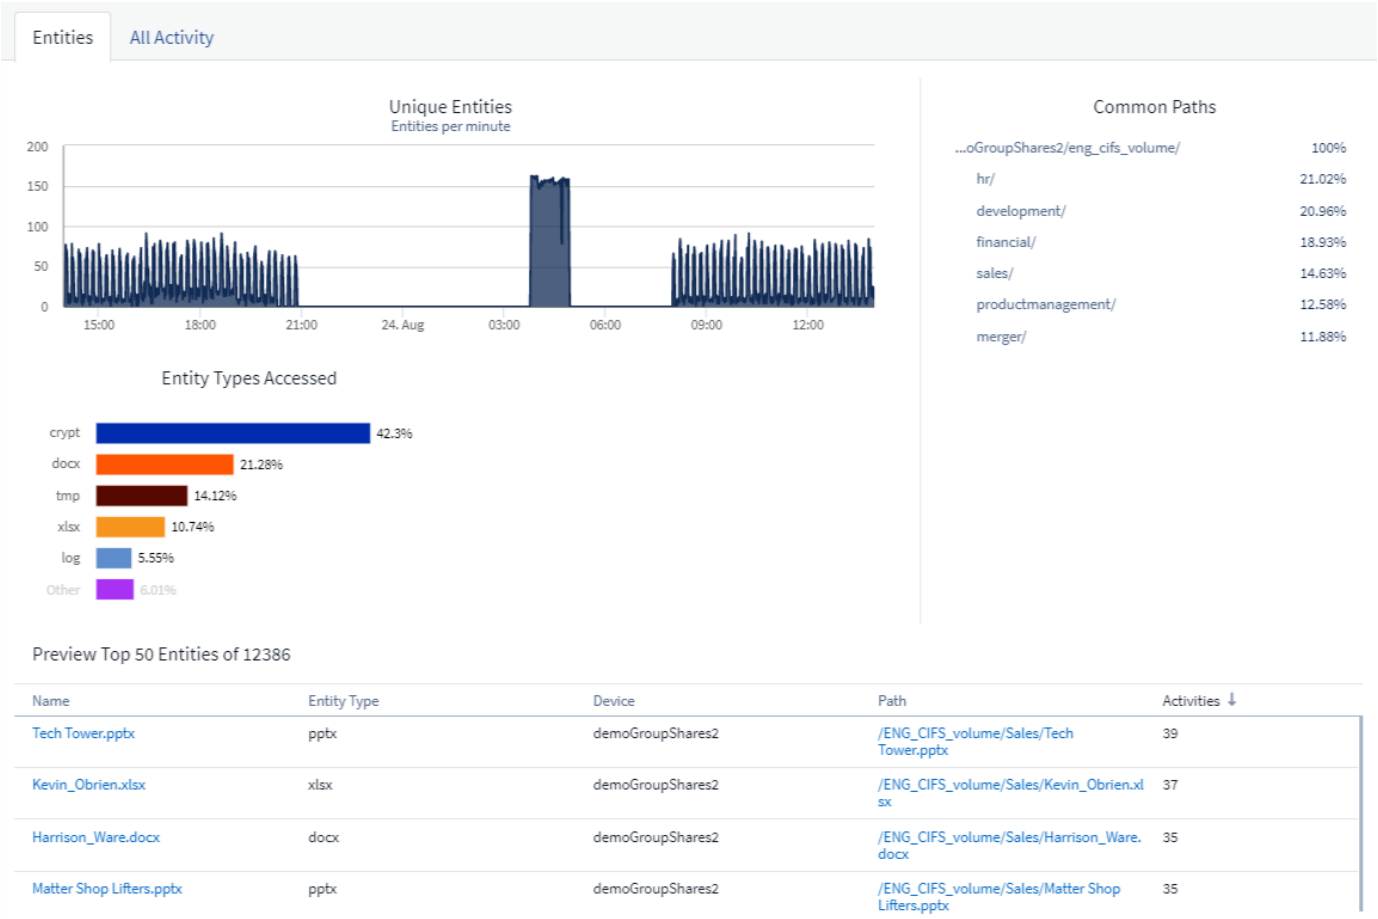
The Forensics Entities page provides detailed information about entity activity in your environment.

Examining Entity Information

Click **Forensics > Activity Forensics** and click the *Entities* tab to access the Entities page.

This page provides an overview of entity activity in your environment, highlighting the following information:
* A graph showing *Unique Entities* accessed per minute
* A chart of *Entity Types Accessed*
* A breakdown of the *Common Paths*
* A list of the *Top 50 Entities* out of the total number of entities



Clicking on an entity in the list opens an overview page for the entity, showing a profile of the entity with details like name, type, device name, most accessed location IP, and path, as well as the entity behavior such as the user, IP, and time the entity was last accessed.
